OUR REF.

YOUR REF.

Sept 20th

Dear Sir :

F I L M S

We have a number of Official Films dealing with the following subjects:

- "The Making of the British Army"
- "Life in the British Army"
- "The British Army in Flanders"
- "Munition Workers"
- "Ship Building and the British Navy"
- "With the British Fleet in the North Sea"
- "Scenes incidental to the Battle of the Somme"
- "Scenes on the Western Front during the Battle of Arras"
- and other war films taken on the Western Front

These are all single reel subjects, consisting of approximately one thousand feet, and occupying a running time of about fifteen minutes.

In addition to the above we also have the following:-

"WOOLWICH ARSENAL" - This is a five-reel film, which deals mainly with the work carried on in the Woolwich Arsenal, in connection with the manufacturing of guns of all sizes, and munitions, and it also shows exactly what work the women of Great Britain are doing in munition plants.

"THE WAY OF A SHIP ON THE SEA" - This is an exceptionally good film in four reels, and deals with the shipping question. It depicts the training of boys for the Mercantile Marine, and takes us right through their course of training until such time as they are qualified for service. It also deals with shipbuilding - the good work done by the Navy in convoying transports and supply ships - drifters and other auxiliaries.

"THE STRENGTH OF BRITAIN" - This film consists of two reels, and visualizes the achievements of Great Britain in all phases of the war, on the many fronts on which she is engaged - both on land and sea. There is a lecture accompanying this film, which can be supplied.

"THE TRAINING OF THE TANKS" - This film deals with the training of the latest implements of modern warfare - "Land Cruisers", and depicts in a vivid manner the strenuous training that the crews of these Tanks have to undergo before they are qualified for service with the armies at the front.

Wherever an entertainment is given, and where no charge is made for admission, these films can be obtained free of all cost therefor, providing you agree to pay express charges both ways - that you will have a competent operator, together with a first-class machine for the projection of any reels you might make application for - and that you will keep the films insured at the rate of fifty dollars per reel from the time they leave this office until the time of their return.

Yours faithfully,

BRITISH BUREAU OF INFORMATION
